

# THE LINER CONTRACTOR

The second generation of Liner Contractor multi purpose Pan Mixers come with both rollers and forced action blades enabling them to be used to mix a massive range of materials.

With the rollers fitted the Liner Contractor will mix any material that needs crushing or kneading as well as mixing and is perfect for lime based products.

In its forced action mode the rollers are replaced with additional mixing blades and is able to mix a wide variety of materials including wet or semi dry concrete, renders, plasters, limecrete, hempcrete, wet pour rubber resin mixes etc

The new Liner Contractor is designed to discharge directly into a wheel barrow or mortar tubs manufactured by Multi Marque
